

The Second International Workshop on Electronic Government and Commerce: Design,
Modeling, Analysis and Security
(EGCDMAS-2005)
in conjunction with The Second International Conference on E-Business and
Telecommunication Networks
3-7 October - Reading, U.K.

Theme:

The rapid growth of e-commerce and the need to deploy efficient e-government solutions are raising new research questions. The important ones are centered around solution development, asset protection, trust and privacy, and strategy and policy formulation. EGCDMAS workshop is soliciting papers on all aspects related to the analysis, design and implementation of solutions for e-government and e-commerce. The workshop offers the opportunity for both academics and practitioners to share models, ideas and experiences.

Topics:

We invite papers describing both theoretical and applied research including, but not limited to, the following topics:

- Security models and risk management
- Authorization, delegation, and access control
- Privacy, anonymity, and data protection
- Intrusion, denial of service and attack detection and response
- Security in content distribution
- Strategy and policy formulation of e-government
- Automated negotiation and bargaining
- Payment and exchange protocols
- E-government and e-commerce engineering
- Accounting and auditing
- Discovery, promotion, and brokering

Submission of Papers

Authors should submit their full papers in English with up to 10 one-Column pages per paper, using the submission instructions indicated in the ICETE main web page at <http://www.icete.org/>. Accepted papers will be published in a workshop proceedings book with an ISBN number.

Important Deadlines

Paper Submission: 15th April 2005

Author Notification: 30th May 2005

Camera Ready Submission: 15th June 2005

Workshop Dates: 3-4 October 2005

Program Committee
